Figure 2 Sensor Output

*Note: Sensor View from Front

This rotary sensor has two active 60 degree ranges with opposing slopes, as shown in Figure 2 and Figure 3. The sensor can be configured to sweep $0-10 \mathrm{~V}$ in both the clockwise and counter-clockwise direction. For counterclockwise rotation, mount the sensor as shown in Figure 3 for the electrically zero position. For clockwise rotation, rotate the sensor mounting 180 degrees.
